

BEEF CATTLE  
**GLU COAT**  
BY NATURAL SOLUTIONS FOR LIVESTOCK

GLU-Coat for cattle is formulated with a high unique blend of sugars that can help speed up rumen activity which helps with appetite and palatability. Due to the high sugars GLU-Coat also aids in maintaining muscle shape in the holding stages of cattle. GLU-Coat for cattle also contains Cell-rate<sup>®</sup> "from the makers of Cellarator<sup>®</sup>" which supports in the process of cellular replication, supports the animals immune system, helps animals get through stressful periods, and aids in muscle and fat development. Fish oil is also formulated in GLU-Coat for cattle because it contains the highest levels of Omega 3 Fatty Acids which helps maintaining a bright shiny hair coat. GLU-Coat for cattle can also help to create higher glucose levels which is stored in the body as fat, giving livestock that bloomy, full, soft look that is demanded in the show ring today.

**GUARANTEED ANALYSIS**

Crude Protein (min.)	4.0%
Crude Fat (min.)	3.0%
